

Verasight Ukraine Survey

April 4, 2022

1 Survey Details

The Verasight Ukraine Survey was fielded from March 21-23, 2022 with a sample size of 1,325 U.S. adults. Respondents were recruited from an existing Verasight panel, composed of individuals recruited via both address-based probability sampling and online advertisements.

The data are weighted to match the Current Population Survey on age, race/ethnicity, sex, income, education, region, and metropolitan status, as well as to population benchmarks of partisanship and 2020 presidential vote. The margin of error, which incorporates the design effect due to weighting, is +/- 3.3%.

To ensure data quality, the Verasight data team implemented a number of quality assurance procedures. This process included screening out responses corresponding to foreign IP addresses, potential duplicate respondents, potential non-human responses, and respondents failing attention and straight-lining checks.

2 Toplines

Question wording: *For each of the following leaders, to what extent do they act in the best interest of the U.S.?*

Note: All respondents viewed Putin, Romney, and Harris, but respondents were randomly assigned to view only one of Joe Biden or Donald Trump.

	Never or almost never	Rarely	Sometimes	Most of the time	Almost always or always
Vladimir Putin	73%	11%	9%	5%	3%
Mitt Romney	22%	21%	35%	16%	6%
Kamala Harris	29%	12%	17%	18%	24%
Joe Biden	32%	12%	15%	17%	23%
Donald Trump	30%	10%	19%	17%	25%
